

Here are some articles that explore themes similar to the discussion of masculinity in American politics from your video:

1. **"Masculinity in Political Discourse: A Forgotten Factor"**:

This article examines how masculinity has historically been overlooked in political discussions, particularly in the context of male-dominated political institutions and campaigns. It analyzes the impact of presenting masculine ideals on voter behavior and political outcomes.

2. **"The Gendered Nature of Political Campaigns"**:

This piece delves into the representation of gender in political campaigns, highlighting how candidates use their gender to appeal to various voter demographics. It discusses how both male and female candidates navigate traditional gender roles, especially in light of recent elections.

3. **"Reevaluating Masculinity in the Age of Populism"**:

This article reflects on the rise of populist leaders and how their portrayals of masculinity resonate with segments of the electorate. It assesses the implications of these portrayals for political engagement and voter mobilization across different groups.

4. **"Social Constructs of Masculinity and Political Identity"**:

This study explores how different social constructs of masculinity inform political identity and behavior. It discusses the intersection of masculinity with race, class, and sexual orientation in shaping political opinions and participation.

5. **"Changing Norms: Masculinity, Gender, and Political Participation"**:

This research addresses how evolving norms around masculinity are influencing political participation and activism, especially among younger voters. It looks at how a shift in understanding masculinity could affect future political landscapes.

6. **"The Politics of Gender: Masculinity and Political Leadership"**:

This article analyzes the implications of masculinity on leadership styles and political strategy. It discusses how leaders embody or challenge traditional masculine ideals and the impact of this on their legislative success and public perception.

7. **"Interdisciplinarity in Gender Studies: Bridging Politics and Sociology"**:

This article advocates for an interdisciplinary framework in gender studies, emphasizing the importance of integrating perspectives from sociology, psychology, and political science to understand complex issues like masculinity in politics.

These articles align with your video's themes by addressing the role of masculinity in political behavior, the evolution of societal perceptions, and the ongoing need for interdisciplinary approaches to study gender in politics.
