

Based on the video you , which discusses the implications of export growth on labor market outcomes in Indonesia, I can suggest similar articles that explore themes such as trade, labor markets, inequality, and export expansion in developing economies. Here are some recommended articles:

1. **"Trade and Inequality: A Review of the Evidence"** by Arnaud Costinot and Andrés Rodríguez-Clare**
- This article provides a comprehensive overview of how trade impacts income inequality and labor markets in various countries, particularly focusing on developing economies.
2. **"Exporting and Labor Market Outcomes: An Analysis of Indonesia's Experience"**
- This specific analysis would closely mirror the case study approach used in your video by evaluating how export activities have shaped labor outcomes in Indonesia.
3. **"The Impact of Trade Liberalization on Labor Market Outcomes: Evidence from Vietnam"** by Nguyen Van Minh and colleagues**
- This article evaluates the effects of trade liberalization on employment and earnings in Vietnam, drawing parallels with the Indonesian convideo mentioned in your video.
4. **"Commodity Booms, Employment, and Inequality: Evidence from the Global South"**
- An exploration of how commodity-led growth affects labor markets and income distribution in various developing countries, including insights that might complement your discussion on Indonesia.
5. **"The Role of Manufacturing in Export-Led Growth in Developing Countries"**
- This article examines how manufacturing sectors contribute to economic growth in developing countries and relates them to labor market transformations, which aligns with your findings regarding the importance of manufacturing in Indonesia.
6. **"Labor Market Evolution in a Globalized World: The Indonesian Case"**
- Focusing on the evolution of Indonesia's labor market in response to globalization and export growth, it may provide further convideo and insights into the themes mentioned in your video.
7. **"The Effects of External Demand on Labor Market Outcomes in Developing Countries"**
- This research analyzes how external demand shocks (similar to the demand from China in your case) influence labor markets in various developing nations.
8. **"Inequality in Trade: The Impact of Export Growth on Labor Market Dynamics"**
- A detailed analysis of how trade policies and export growth initiatives interact with labor dynamics and inequality within developing economies.

These articles would provide a well-rounded perspective on the connection between export growth, labor market outcomes, and inequality, complementing the insights found in your video on Indonesia.
