

Faculti Summary

<https://faculti.net/percentage-of-he-student-qualifications-obtained-in-science-subjects-by-personal-characteristics-2018-19-to-2022-23/>

Here are five key points from the video:

1. **Distribution by Gender**: The data presents the percentage distribution of higher education qualifications in science subjects based on gender, indicating trends over a five-year period.
2. **Increase in Female Representation**: There is a notable increase in the number of female students obtaining qualifications in science subjects.
3. **Age Group Trends**: The trends also highlight participation in higher education science qualifications across different age groups.
4. **Consistent Participation**: Younger and middle-aged groups show consistent participation in science-related qualifications, suggesting a stable interest in these areas.
5. **Minimal Contributions from Unspecified Ages**: There is little to no representation from age groups that are unspecified, indicating that the focus is primarily on defined younger and middle-aged demographics.
