

Faculti Summary

<https://faculti.net/key-global-health-indicators-life-expectancy-mortality-and-fertility-trends-2000-2023/>

The analysis reviews three important health indicators: life expectancy at birth, under-five mortality rate, and total fertility rate from 2000 to 2023 across various countries.

1. ****Life Expectancy at Birth****: This video video metric indicates the average number of years a newborn is expected to live, reflecting improvements in healthcare, living conditions, and economic development.
2. ****Under-Five Mortality Rate****: This video video indicator shows the number of deaths per 1,000 live births for children under five, which has decreased due to advancements in child healthcare and nutrition.
3. ****Total Fertility Rate****: This video video rate represents the average number of children a woman is expected to have during her lifetime, influenced by socioeconomic factors, education, and family planning trends.
