

Faculti Summary

<https://faculti.net/net-migration-trends-by-region/>

This video discusses net migration trends across different regions from 2014 to 2023, using a visualization to illustrate these changes. The Y-axis represents net migration in millions. In 2023, North America saw a significant net inflow of 1.76 million immigrants, indicating its continued appeal. In contrast, Sub-Saharan Africa experienced a net outflow of 0.66 million, highlighting the challenges that lead to emigration. Overall, the migration trends are influenced by various economic, social, and geopolitical factors worldwide.
