

Faculti Summary

<https://faculti.net/spencers-phenomenological-variant-of-ecological-systems-theory-pvest/>

This video discusses the PVE S (Phenomenological Variant of Ecological Systems Theory) in the context of human development. It emphasizes understanding both risk and protective factors that individuals face, especially during adolescence. The research by Margaret Bill Spencer and the impact of the Clark doll studies on desegregation of schools are also highlighted. This video emphasizes the importance of considering individual perspectives, qualitative and quantitative research methods, and creating safe environments for identity development in adolescents.
